EDUCATION

Birla Vishvakarma Mahavidyalaya | *B.Tech in Information technology*

Anand, Gujarat | 2024 – 2028

- Currently (2nd yr)
- 3st Sem SPI : **10.00**
- CPI – **9.76**

Gajera International School | *HSC [CBSE] – Class 12*

Surat, Gujarat | 2022 – 2024

- Class 12 : **93.40 %**

Gajera International School | *SSC [CBSE] – Class 10*

Surat, Gujarat | 2010 – 2022

- Class 10 : **92.60%**

TECHNICAL SKILL

- **Programming Languages:** C++ , Python
- **Web Development:** HTML, CSS, JavaScript, MERN Stack (MongoDB, Express.js, React, Node.js) , PHP
- **Database Management:** MongoDB , MySQL
- **Other Skills:** Data Structures & Algorithms , Problem-Solving , Data cleaning and Analysis , Postman , Git&Github

PROJECTS

1. **CryptoAssure** – Automated Cryptographic Security Evaluation Engine

[Jan - Feb 2026]

- **Tech Stack:** Python, FastAPI, Cryptographic Libraries, Statistical Analysis, Gemini API **Github:** [CryptoAssure](#) [Github](#) 
- Developed a **Python-based cryptographic evaluation engine** analyzing encryption outputs using metrics such as avalanche effect, entropy, frequency distribution deviation, and key strength estimation
- Implemented a **rule-based validation system** to detect insecure cryptographic configurations (e.g., weak key sizes, insecure modes like ECB) and compute a standardized security score
- Integrated an **AI-powered recommendation engine using the Gemini API**, feeding statistical evaluation results to generate security insights and configuration improvement suggestions

2. **Sangam** – Web application for sharing Thoughts for social connectivity of people 

[Sept - Nov 2025]

- **Tech Stack:** React, Node.js, Express.js, MongoDB, FastAPI, DistilBERT, Google OAuth
Deployment: Vercel (Frontend), Render (Backend), Hugging Face (ML Model) **Github:** [Sangam](#) [Github](#) 
- Developed a **full-stack MERN application** enabling user authentication, thought posting, profile management, and social interactions (follow, like)
- Integrated an **NLP emotion detection system using a 66M-parameter DistilBERT model** to analyze user thoughts and infer emotional sentiment
- Deployed a **FastAPI inference service on Render** with the ML model hosted on Hugging Face, enabling scalable real-time emotion prediction via REST APIs

3. **ZestyCart** – Web based Food Ordering application 

[june - july 2025]

- **Tech Stack:** Node.js, Express.js, MongoDB, EJS, Cloudinary
Deployment: Render **Github:** [ZestyCart](#) [Github](#) 
- Developed a **full-stack food ordering system** supporting menu browsing, order placement, and automated receipt generation
- Designed a **role-based admin dashboard** enabling CRUD management of food items and basic sales analytics for order tracking
- Integrated **Cloudinary cloud storage** for scalable image hosting and optimized media delivery across the platform

ACHIEVEMENTS

- Completed **Summer Analytics Program** Conducted by IIT Guwahati
- Secured **5 🌟 in C++** and **4 🌟 in SQL** on **HackerRank**
- Achieved **Runner-up position** in **Ideathon 2024**.
Project – Sustainable Solar panels for Vallabh Vidhyanagar

CERTIFICATIONS

- [Summer analytics 2025](#)-Certificate of Excellence
